

REMARKS

Claims 15-19 are pending and under consideration. New claims 19-21 are added.

Independent claim 15 recites displaying simultaneously a major channel number and at least one minor channel number of programs received through said major channel. In contrast, Eyer (relied upon as teaching displaying major and minor channel numbers) teaches that the display sequence goes 10 (primary channel) and then 111 (secondary channel). Thus, the primary and secondary channel numbers are not simultaneously displayed.

These features were previously pointed out to the Examiner. In response, the Examiner states that, for example, "10.1" represents the major channel "10" and the minor channel ".1" being simultaneously displayed. Applicant respectfully disagrees. In the scheme of Eyer, "10" is the major channel and "10.1" is the minor channel. However, "10" and "10.1" are not simultaneously displayed.

Accordingly, withdrawal of the rejection is requested.

New claims 19-21 are patentable over the cited references at least due to their dependency from claim 15.

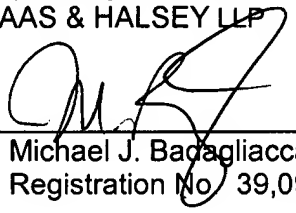

There being no further outstanding objections or rejections, it is submitted that the application is in condition for allowance. An early action to that effect is courteously solicited.

Finally, if there are any formal matters remaining after this response, the Examiner is requested to telephone the undersigned to attend to these matters.

If there are any additional fees associated with filing of this Amendment, please charge the same to our Deposit Account No. 19-3935.

Respectfully submitted,  
STAAS & HALSEY LLP
